

Consulting & Planning - Construction & Service

Our expertise is to consult individuals, farmers, architects, companies and investors in a manufacturer independent way.

Here we deliver detailed planning, correct building and construction by proven experts plus a 20-year-maintenance and service to guarantee the best security. In addition we inform you about the profitability and financing of your project.

Choose the eco-friendly way for producing power and ensure your financial success with a photovoltaic plant.

- We take the individual ambient conditions into account before we counsel you.
- We always inform you manufacturer independent to let you have the best basis for your decision.
- We show the ideal photovoltaic-solution starting with the evaluation of the surfaces up to choosing the best components for your photovoltaic plant.
- We calculate the profitability of the planned plant and show financing possibilities.
- We guarantee highest technical standards. The knowhow of our personnel is based on a long term experience on the job.
- We only use premium materials and systems to deliver the best possible safety for you.
- We improve our standards permanently by national and international skill enhancements.
- We serve your photovoltaic plant one year for free to ensure a 100% capability of the plant.
